(AANP) Pain Management and Opioids: Balancing Risks and Benefits

Brett B. Snodgrass FNP-C, CPE, FACPP, FAANP

2.0 CE Credits

****non BON mandatory*** CE per AANP**

This activity presented by AANP is based on the nationally vetted safe opioid prescribing standards using the FDA REMS blueprint. Content discusses (1) pain assessment and screening tool recommendations; (2) opioid trial components including patient/provider agreements and informed consent use, expected activities during the prescription trial phase of treatment including the decision to stop treatment; (3) components of long term therapy including ongoing assessment tool use, urine drug testing frequency, updating PPA and informed consents; and (4) issues related to termination of care. Red flag behaviors are discussed as well as complex pain management case studies. Pharmacology information includes the CO*RE content on immediate and long acting opioid use, equal analgesic dose changes, drug families and new drug formulations.
